*Immediate Joiner, Bangalore*

## Summary

Full-stack developer with 1+ year of commercial experience building production web applications in agile teams. Built a distributed configuration drift monitoring system with real-time alerting, two-factor authentication, and multi-role access control. Seeking SDE / Full-Stack Engineer roles in Bangalore.

## Professional Experience

**Litmus IT Services Pvt Ltd** | Andheri East, Mumbai | Mar 2026 - Sep 2026

*Software Developer - Full Stack*

- Engineered full-stack features for Project Vigil, a DC/DR configuration drift monitoring platform (React 19, Node.js, Express 5, MySQL, Prometheus).
- Built the **Admin Console and Management Dashboard** with role-based access control across a six-role permission system.
- Built real-time dashboards using React Context API and memoization for optimized state management.
- Implemented **dependency-injected controller factories** for isolated backend unit testing.
- Designed the Express middleware chain, including JWT authentication with session revocation, CORS, rate limiting, and RBAC enforcement.
- Implemented **TOTP-based two-factor authentication (RFC 6238)** for secure login.
- Integrated Prometheus (PromQL) for real-time metrics aggregation and optimized API performance with caching.
- Built a **Server-Sent Events (SSE)** module for real-time alerts and supported UAT across sprint cycles.

**Bitsmith Technologies Pvt Ltd** | Pune | Apr 2024 - Dec 2024

*Software Engineer*

- Built and enhanced client-facing ReactJS modules, improving page load performance through code splitting and lazy loading.
- Integrated **third-party APIs** for payments, notifications, and analytics, and automated internal workflows to reduce manual processing.
- Managed sprint deliverables in Jira and authored technical handoff documentation to streamline onboarding for new team members.

## Key Projects

Buyosphere: Full-Stack E-Commerce Platform

*TypeScript, MongoDB, Express.js, React.js, Node.js, Redux Toolkit, Firebase, Stripe*

- Engineered a production-grade e-commerce platform with JWT authentication, real-time cart management, and **Stripe payment integration**.
- Designed RESTful API architecture with parameterized queries, input validation, and role-based route protection.
- Built a responsive React storefront with **centralized state management**, optimizing the checkout flow for fast page loads.

Plethora: Training and Placement Management System

*React.js, Ant Design, Java, Spring Boot, MySQL, Spring Security, JWT*

- Designed role-based access control for students, faculty, and recruiters using **Spring Security** and JWT authentication.
- Automated end-to-end placement drive workflows from registration to shortlisting, replacing manual coordination entirely.
- Built a responsive React dashboard with **Ant Design** for real-time tracking of placement metrics and drive status.

Cafe Noir: Restaurant Menu and Ordering Platform

*Vite, React, TypeScript, shadcn-ui, Tailwind CSS*

- Built a fully interactive restaurant menu and ordering platform with **time-aware theming** that switches the UI between morning, afternoon, and evening palettes.
- Implemented multi-section menu with item modals, a slide-out cart with real-time total calculation, and a full checkout flow.
- Designed smooth scroll-triggered animations and a Chef's Note sidebar for a polished, production-quality experience.

## Technical Skills

**Languages:** JavaScript (ES6+), TypeScript, Java, Python, SQL, HTML, CSS

**Frontend:** React 19, Redux Toolkit, Zustand, Context API, Tailwind CSS, Vite

**Backend:** Node.js, Express 5, Spring Boot, REST APIs, JWT Authentication, TOTP/2FA, Server-Sent Events, Middleware Design

**Databases:** MySQL, MongoDB, Firebase, Prometheus/PromQL

**Tools:** Git, Jira, Postman, Jest, Docker (basic), Claude Code

## Education

**B.E. Computer Engineering**, Sinhgad College of Engineering, Pune (SPPU) | 2019 - 2023 | CGPA: 7.67/10.0
